

FIMSA 2018

CROSSTALK BETWEEN INNATE AND ADAPTIVE IMMUNITY
IN HEALTH AND DISEASE

Hosted by

Subhra K. BISWAS

Dr Biswas completed his Ph.D. in Biotechnology (Cellular Immunology) at Banaras Hindu University, India in 2002. Thereafter, he extended his Ph.D. work on chemokine biology as a postdoctoral visiting scientist at the Istituto di Ricerche Farmacologiche "Mario Negri", Milan (Italy) working in the group of Prof Alberto Mantovani and Antonio Sica. During this period, he was awarded a fellowship of the Alfredo Leonardi and G. Pfeiffer Foundation (2003).

His principal research contributions include a) the first demonstration of the chemokine, MCP-1-induced activation of murine macrophages and its underlying mechanisms and b) the molecular characterization of tumor associated macrophages (Collaborative project with National Cancer Institute-Frederick, USA). In 2005, he joined the Bioinformatics Institute of A*STAR in Singapore as Research Scientist (In-Charge) of the Cell Interaction group, before moving to SIgN in 2007. Dr Biswas is an adjunct associate professor in the Department of Microbiology, Yong Loo Lin School of Medicine, National University of Singapore.

Adjunct Positions

- Adjunct Assistant Professor, Lee Kong Chian School of Medicine, NTU, Singapore
